

## **Topic-** Fuel Price.....

I filled up my car's fuel tank, and I thought fuel has become really expensive after the recent price hike.

But then I compared it with other common liquids and did some quick calculations, and I felt a little better.

To know why, see the results below – you'll be surprised at how outrageous some other prices are!!

**Diesel (regular):** Rs.44.08 per liter

**Petrol (speed):** Rs.57.68 per liter

**Coca Cola 330 ml can :** Rs.20 = Rs.61 per liter

**Dettol antiseptic 100 ml** Rs.20 = Rs.200 per liter

**Radiator coolant 500 ml** Rs.160 = Rs.320 per liter

**Pantene conditioner 400 ml** Rs.165 = Rs.413 per liter

**Medicinal Mouthwash like Listerine 100 ml** Rs.45 = Rs. 450 per liter

**Red Bull 150 ml can :** Rs.75 = Rs.500 per litre

**Corex cough syrup 100 ml** Rs.57 = Rs. 570 per liter

**Evian water 500 ml** Rs. 330 = Rs. 660 per liter

**Rs. 660 for a liter of WATER!! And the buyers don't even know the source (Evian spelled backwards is Naive...)**

**Kores whiteout 15 ml** Rs. 15 = Rs. 1000 per liter

**Cup of coffee at any decent business hotel** 100 ml Rs. 50 = Rs. 500 per liter

**Old Spice after shave lotion** 100 ml Rs. 175 = Rs. 1750 per liter

**Pure almond oil** 25 ml Rs. 68 = Rs. 2720 per liter

And this is the REAL KICKER...

**HP DeskJet color ink cartridge** 21 ml Rs.1900 = Rs. 90476 per liter!!!

Now you know why computer printers are so cheap? So they have you hooked for the ink!

So, the next time you're at the pump, don't curse anyone – just be glad your car doesn't run on cough syrup, after shave, coffee, or God forbid, printer ink !
